

Tender Evaluation Matrix

Simplified steps for use of the Tender Evaluation Matrix
Apply the 80:20 preference point system for tenders up to R50 Million

Having prepared and sent out RFx or EOI and having received responses	Having discussed and agreed each bidder's performance against the selection criteria including critical factors	Having evaluated all bidders on Functionality/Technical criteria	Having entered Prices for each bidder	Having entered the BEE scores for each bidder	Change Control
Step 1	Step 2	Step 3	Step 4	Step 5	
Go to List of Proposals Worksheet. Enter name of project, Cluster/portfolio name, final approver, list members of supplier selection committee and add the procurement steering committee members (where applicable), ensure committee members signed declaration of interest form, and insert the date of evaluation. ↓ Now enter names of bidders who responded, including those who were eliminated plus reason for elimination. Elimination reason column only allows two lines. When the bidder is restricted by National Treasury or listed on Register of Tender Defaulters. Please select "Y" on relevant column, and Eliminated column i.e. "NT Restricted Bidders" and "Eliminated". Print the List of NT restricted suppliers and Register of Tender Defaulters through the link under "Notes" as supporting document. Ensure bidders meet all Elimination Criteria. Select "Y" if bidder met Elimination Criteria, Select "N" is not met, and indicate which criterion/Criteria did not met under "Elimination Reason" column. The matrix caters for 50 Bidders. Should you require to evaluate more than 50 Bidders, please contact the SCM to create more lines for you.	Go to Functionality Points Worksheet. Finalise functional factors and weights. All functional factor must have weights. Weights must add to a total of 100. Only a maximum of 20 functional factors can be captured per matrix. ↓ Enter minimum functionality score required for each criteria (H23) e.g. 5, 6 etc., and overall (H24) e.g. 60%,70% etc. Ensure that scores are as per published tender scoring ranges/rubrics and are correctly inserted. RFQs without Functionality/Technical Evaluation Please select only select first ROW, i.e. A4 to AZ5. On Cell A4 insert " Functionality evaluation not applicable" and Cell B4 to Cell AZ4 insert "N/A". Please the leave the "minimum scores requirement Cells i.e. "H23" and "H24" blank. Elimination Criteria Requirement Elimination criteria must be evaluated before functionality/technical evaluation. Please confirm on Cell B2 if Elimination criteria was evaluated or not applicable.	Go to Price Evaluation Worksheet and enter prices per bidder. ↓ Enter bid prices (Including VAT) only for those bidders who qualified on functionality points. Please do arithmetic checks on pricings before capturing them. Any price discrepancies must be clarified with the bidder permitted by the Supplier Selection Committee. Pricing cell can take a maximum of 22 digits including currency sign and 2 decimals.	Go to B-BBEE Scoring Worksheet. ↓ Check bidders' Preference Points based on specific goals Credentials. Enter score a bidder as per bottom table using ranges and points allocations. Bidder must submit prescribed documents to claim preference points. Failure to provide these documents used for purposes of scoring a bid, will not result in a bidder's disqualification. However, Bidders will receive an automatic score of zero for the preference points evaluation. Bidders are therefore urged to ensure that all these documents are returned with their Proposals.	Go to Summary of Assessment Worksheet. Observe results. ↓ Write a Recommendation in the Summary of Assessment Worksheet. The working matrix can serve as "Evaluation Report" for procurement below R4m (VAT Excl). Any procurement above R4m (VAT Excl), an official "Evaluation Report" is required. Each member of the evaluation team must sign the evaluation report if applicable. ATTACH the report when loading a Requisition or circulating your contract for approval Complete the "Pre-Payment" details before award. Check the bidder's tax status on CSD before award. Complete the "Bid Validity Period" details before award. Eppendorf Serological pipettes Motivation – Business case and need for procurement (<i>where and for what the goods, works/services will be used</i>): Our laboratory performs advanced human cell culture work that involves converting adult cells into stem cells, guiding these stem cells to develop into specialized cell types, and conducting precise functional assays such as gene editing and metabolic profiling. These processes are highly sensitive to how liquids (including consumables, media, nutrients, and reagents) are handled. Even small inconsistencies in volume or dispensing speed can affect cell health, growth, and overall experimental outcomes. Our laboratory has validated the Eppendorf electronic serological pipettes (EP 0030127714/22/30) for accuracy and consistency and has implemented their use as standard practice for more than five years. Their reliable performance helps protect valuable cell cultures by enabling gentle,

6	Detailed motivation why a competitive bidding process <u>cannot</u> be followed. <i>(If this information is already captured in a memo, the memo can be attached as supporting documentation)</i>	Given the complex and extremely sensitive nature of our laboratory work, as highlighted above, precise and consistent liquid handling is essential. The laboratory has validated the Eppendorf electronic serological pipettes (EP 0030127714/22 /30) for accuracy, precision, and protocol compatibility, and they have been used as standard equipment for more than five years. Their controlled dispensing and reproducible performance are critical to protecting delicate cell cultures, minimizing reagent waste, and preventing costly experimental failures. Thus, deviation from an open competitive bidding process is justified, and procurement should be limited to the three authorized local Eppendorf distributors listed above. This is necessary to meet manufacturer specifications, warranty requirements, and established validation standards, and to ensure the procurement of genuine Eppendorf products that maintain performance consistency and research integrity. Procuring through accredited distributors safeguards continuity of research operations and protects institutional research outputs.

CSD REGISTRATION REPORT

Identifier

CSD cannot electronically verify the identity of a supplier other than a South African Individual / Sole Proprietor (through Home Affairs) or a company registered at the Companies and Intellectual Property Commission (CIPC). For this reason, a disclaimer is displayed for supply chain practitioners to obtain supporting documentation to verify the identity and legitimacy of a supplier in these cases.

Bank

For help on how to resolve bank failures click here: [I received an email stating the bank information I captured on the CSD was sent for bank account validation and could not be validated. The response received from the bank contains an error message.](#)

The various possible error messages received from the bank are highSemiBolded in red. Search for the applicable message and follow the detailed steps associated with that error message.

Organs of State are required, where not automatically verified by CSD, to manually verify this information with the applicable accreditation body as per current policies and procedures. Expired certificate information do not reflect on the report.

RESTRICTION

Restricted Supplier - A supplier is restricted by using the identification number of the entity e.g. CIPC registration -, trust -, Social Development non-profit -, South African ID -, Foreign company registration number or ID number. If there is more than one CSD Supplier profile registered on CSD with the same entity identification number, all those related supplier profiles will be restricted.

Restricted Director - A director/owner is an individual person and is restricted by using the South African ID or Foreign ID number. If a director belongs to different companies and has been restricted, the director will reflect as restricted in all companies where identification number is detected.

Restricted Suppliers & Directors are listed on CSD under Help - [Am I restricted?](#)

The CSD does not automatically verify foreign company registration number, international securities identification number, foreign identification numbers, foreign passport numbers, work permit numbers, foreign bank accounts, B-BBEE, demographic and accreditation information. Organs of State are required to manually verify this information with the applicable verification institutions as per their current policies and procedures.
